Id	ON	Relation description	Source type	Connection type
----	----	----------------------	-------------	-----------------

2. You can create few types of relations: DIRECTORY to DIRECTORY, FTP to FTP, DIRECTORY to FTP or FTP to DIRECTORY.

Please select: Directory -> FTP

Also type name of relation.

The screenshot shows a dialog box for adding a new relation. It has two input fields: 'Relation description' with the value 'invoices' and 'Relation with' with a dropdown menu showing 'DIRECTORY'. To the right of the dropdown is a 'to' label and another dropdown menu showing 'FTP'. There is an 'Add' button on the right side of the dialog.

3. Main setting:

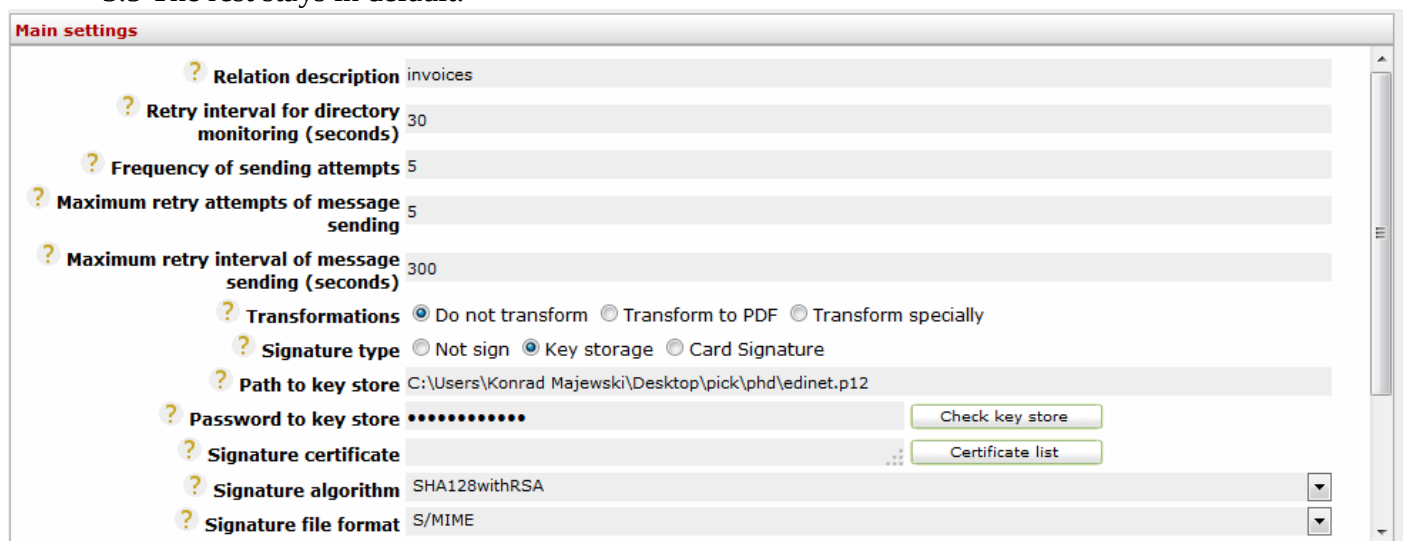

3.1 Signature type: please select **Key storage**

3.2 Path to key store: type the path where you put Edinet key (you got from Edinet helpdesk, file **edinet.p12**)

3.3 Enter the password

3.4 Click on Certificate list, select certificate and click OK.

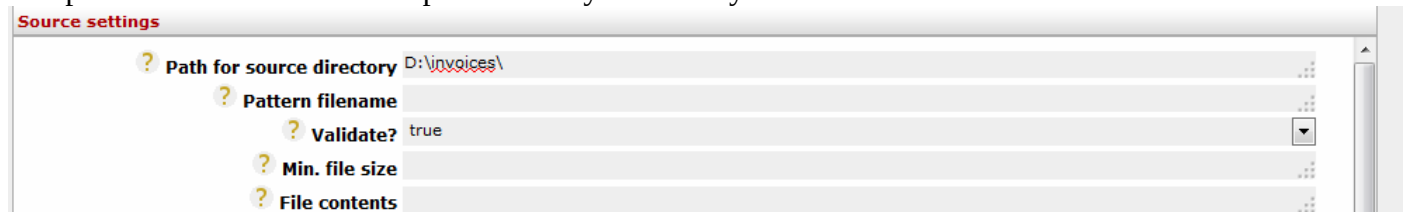

3.5 The rest stays in default.

The screenshot shows the 'Main settings' dialog box. It contains several fields and options: 'Relation description' (invoices), 'Retry interval for directory monitoring (seconds)' (30), 'Frequency of sending attempts' (5), 'Maximum retry attempts of message sending' (5), 'Maximum retry interval of message sending (seconds)' (300), 'Transformations' (radio buttons: Do not transform, Transform to PDF, Transform specially), 'Signature type' (radio buttons: Not sign, Key storage, Card Signature), 'Path to key store' (C:\Users\Konrad Majewski\Desktop\pick\phd\edinet.p12), 'Password to key store' (masked with dots), 'Signature certificate' (with a 'Certificate list' button), 'Signature algorithm' (SHA128withRSA), and 'Signature file format' (S/MIME). There are also 'Check key store' and 'Certificate list' buttons.

4. Enter the source settings:

The place where invoices are imported from your ERP system.

The screenshot shows the 'Source settings' dialog box. It contains several fields: 'Path for source directory' (D:\invoices\), 'Pattern filename' (empty), 'Validate?' (true), 'Min. file size' (empty), and 'File contents' (empty). There are also buttons for file selection and validation.

5. Enter the destination settings.

You got those data from Edinet helpdesk.

Host name: ftp.infinite.pl

Remote directory: **/invoice/**

Port: 21

User name and password are different for every client.

Destination settings

? Host name ftp.infinite.pl

? Port 21

? Remote directory /invoice/

? User name test
